

## June 2007 LuckyAstrology Newsletter

Hiking Cathedral Rock - Sedona, AZ

Greetings, Friends and Family

**In this newsletter**, we're giving you a little example of astrology on the road from my perspective and one of the state's abbreviation analysis from Joy's handwriting expertise as well as a forecast for the second half of June 2007.

**Traveling Fun:** Joy (Joyce Sterling to most of you) and I were happily traveling in our van that is a wannabe motorhome, through Nevada, Colorado, Kansas, Missouri, and Illinois on our way to Indiana to see a grandson of Joy's graduate from high school and back again to California via Missouri, Oklahoma, Texas, NM and Arizona - thus the Sedona, AZ photo above.

I always joke and say we were going to Indiana to check out the Indians there. As it turns out, there are absolutely no Native American reservations (or Indian Casinos) in Indiana - plenty of them in other states however.

As some of you know, I ask everyone their birthdate after engaging them in conversation, and since I'm interested in their lucky sign, I pull out my handy dandy little Jupiter chart, look up their Jupiter sign, and talk to them about what areas to put energy into to be luckier.

Here's a few from our travels for the fun of it. My cousin, Charlotte, who we visited in Colorado Springs, CO works for the Air Force. She has a Cancerian Jupiter. The Air Force, other branches of the Service and even police are under the sign of Cancer, the protector. Her upbeat partner, Gary, is always extremely busy doing something and wouldn't you guess it, his Jupiter sign is Gemini.

I even found astrology in geology - like in Kansas, the Cancerian and Virgo influence is prevalent with all the green fields of growing grass.

And speaking of Kansas, the people in the Thai restaurant in Kansas where we ate were also interesting. The co-owner, who has a Pisces sun sign, has empathy (a Piscean trait) for his guests and always directs them, he told us, to nearby places to eat if they prefer food other than his Thai food. His waitress, a "Scorpiarius," that's a person on the Scorpio/Sagittarius cusp, is working in the right restaurant we told her -- since Thailand is a foreign country and Sagittarians are connected with foreign countries. She also said she has been wanting to study astrology, a deep passion of hers for a long time - ah yes - a Scorpion trait- passion!

As we drove through Kansas we picked up tidbits about the state - like did you know this was the home state of Dwight D. Eisenhower and home of his Presidential Library in Abilene? Also that Ike started the freeway system in the U.S. in 1956 and Kansas has the first eight miles of it?

**Kansas K's in Handwriting:** In the meantime, while I was talking up people and guessing signs, my partner, Joy, was busy with the alphabet and relating it to history of the states visited. She's been a handwriting analyst for over 30 years, but in the last six months has found an alphabet (the Vimala alphabet) that has a spiritual resonance to it. Each letter form of this alphabet is connected to a quality that if practiced in a specific way could improve that feature/quality in a person's life.

In Kansas, Joy thought of the first letter of that word - the "K" -in handwriting and handwriting analysis the letter of authority and one's relationship to hierarchical powers. In the Vimala alphabet, Kansas is formed like this:

*Kansas (KS)*

Anyway, "K" is Kansas's personal letter and combines nicely with the letter "S" -- the KS of the zipcode abbreviation of Kansas. "S" in the Vimala alphabet is the letter of balance - balancing all aspects of life, the physical, emotional, spiritual and mental.

*Kansas* is in the exact middle of America (now that's balance!). During the Civil War, the territory of Kansas had to decide how it planned to enter the Union - as a pro-slavery or as a free state. At first the pro-slavers were in authority in the territory's legislature and it looked like they'd win. But defying that authority, another "free-state" group set itself up as "legislators" and thumbed their collective noses at the elected body.

Cannon and rifles were called in by the powers that be and they were literally pointed at that self-appointed body. Guess what? They got the message and backed down. But not for long. As it turned out, Kansas entered the Union as a free state, not condoning slavery. Its citizens selected new, more enlightened leaders. Kansas, it appears, is a true "K", defying authority when needed and establishing a connection with an authority that holds all men/women as equal - which brings in that "S" quality of balance. Hey, maybe even Dorothy and Toto would agree!

**June Forecast:** What to put energy into in June -- the second half of June is a **powerful** time to focus on our hopes, wishes and dreams and make some real plans for bringing them about in our lives. Choose to take revelations and ideas to the **material** level where they can be realized and lived out through proper and concrete planning and through business avenues.

On the **spiritual** level, we will do well by concentrating on only the highest most respectable vibrations. All meditating can be rewarding for our long range planning for impressive spiritual awareness. Strive for **powerful** guidance, direction that we can help create. Professional new-age readings can be energizing and more rational at this time.

On the **mental** side, our conscience can tell us which hunches to follow. On the fun side, formal dancing, sailing, the ocean and especially cruises can be joyful.

On the **political** side, humanitarian ideas should be adopted to create a more useful and spiritual planet.
